Status:	Failed
Project:	QA6 Tansey
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Type:	Test Execution	Priority:	Medium
Reporter:	Tansey Sussex	Assignee:	Unassigned
Resolution:	Done	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original Estimate:	Not Specified		

Test Preconditions:	<ul style="list-style-type: none">• Refer to Test Plan  QA6T-46 Open• Refer to Test Case  QA6T-66 Open• Site is available here• Login to user account
Test Script:	<ol style="list-style-type: none">1. Select a book and open the book info page for it2. Select the Want to Read button and click<ul style="list-style-type: none">○ Observe that the button changes to grey and says "Want to Read" with a checkmark3. Return to the homepage and select another book4. On the book page select Already Read from the Want to Read button5. Use the My Books menu and select My Reading Log<ul style="list-style-type: none">○ Observe that the books you selected show up under the correct reading log lists6. Select a book and click Read<ul style="list-style-type: none">○ This will load and open the book7. Click through a couple pages and return to the homepage8. Return to the Reading Log page and check that the book you are currently reading shows up on the Currently Reading list9. Return to the homepage10. Select a book and open the book page

	<ol style="list-style-type: none"> 11. Use the Want to Read menu and select Create New List <ul style="list-style-type: none"> ○ This will open up a popup page called "Create a new list" 12. Complete the list details and click cancel 13. Repeat the process, complete the details, and select the Create New List button 14. Repeat this process, selecting a couple more books to add to the list you just created 15. Select a couple books and create a second list 16. Use the My Books menu to go to the My Lists page 17. Ensure that the lists and books show up correctly 18. Select a list, open it, and use the Edit link to update the name/details 19. Select a list, open it, and check that you can delete an item from the list 20. Return to the My Lists page and delete your lists <ul style="list-style-type: none"> ○ This should clear the lists from your My Lists page, but your recent activity should still show up
Test Postconditions:	The user should be able to manage all functions relating to tracking books they want to read, books they are currently reading, books they have read, reviewing books, and creating reading lists.
Test Execution Notes:	<ul style="list-style-type: none"> • Refer to test case  QA6T-66 Open • This test checks that the user should be able to track the books they are currently reading, would like to read, and have read in. It also checks that the user can create book lists and can organize books into lists.
Expected Result:	The user can track all books they are reading, books they would like to read, and books they have read. The user can also create book lists and organize books into lists.
Actual Result:	<ul style="list-style-type: none"> • The user was able to access the list of books they would like to read, and if they click back to the individual book page they can add that they completed reading the book. However, the Currently Reading page isn't tracking the books that the user is currently reading. There was also not a way for the system to automatically track what books a user had borrowed so they could refer back to their past books, aside from marking that they read each item individually. • Refer to Improvement Reports: <ul style="list-style-type: none"> ○ Past book tracking  QA6T-69 Open • Refer to Bug Reports: <ul style="list-style-type: none"> ○ Currently Reading Not Tracking  QA6T-68 Open
