Search Functionality (QA6T-55)

[QA6T-56] Search Functionality Execution QA6T-55 Created: 06/Aug/18 Updated: 09/Aug/18 Resolved: 07/Aug/18

Status:	Failed
Project:	QA6 Tansey
Component/s:	None
Affects Version/s:	None
Fix Version/s:	None

Type:	Test Execution	Priority:	Medium
Reporter:	Tansey Sussex	Assignee:	Unassigned
Resolution:	Done	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original Estimate:	Not Specified		

Test Preconditions:	• Refer to Test Plan QA6T-46 Open • Refer to Test Case QA6T-55 Open • Site is available here • Login to user account

Test Script:	1. Test searching using the search bar at the top of the homepage.
	   ◦ Perform searches using the dropdown menu options:
	      ▪ All
	      ▪ Title
	      ▪ Author
	      ▪ Subject
	      ▪ Text
	      ▪ Advanced - ensure this takes you to the Advanced Search page
	2. Return to the homepage
	3. Using the "More" dropdown menu navigate to the Advanced Search page
	   ◦ Perform searches using the following fields:
	      ▪ Title
	      ▪ Author
	      ▪ ISBN

	▪ Subject ▪ Place ▪ Person ▪ Publisher <ol start="4"> - Click on the "Full Text Search?" link ○ This will take you to the Search Inside page - Pick characters out of a book and search for them ○ Ensure that results are accurate - Return to the homepage - Scroll to the bottom of the page, locate the Discover column and ensure the following search functions work correctly: ○ Books ○ Authors ○ Subjects ○ Advanced Search
Test Postconditions:	The user should be able to search using the regular search bar, the various fields on the advanced search page, and returned search results with accuracy.
Test Execution Notes:	- This execution tested the search options and functionality - Refer to test case QA6R-55 - Refer to bug report: ○ Search Page not Behaving as Expected [QA6T-57](#) Open ○ Button Inconsistencies [QA6T-65](#) Open - Refer to improvement recommendation: ○ [QA6T-58](#) Open Search Button Default to Everything
Expected Result:	The user should be able to use the various search methods found on the site to return accurate results. All search pages should function as expected and be easy to use and understand.
Actual Result:	There were issues using the search page found at https://openlibrary.org/search to switch between resource types. The word "Disabled" was also under the search box and when clicked on caused a search that returned a long list of results. The same thing happened when the user switched the resource type to Print from that page.
